

SafeSight User Guide: Command Center Operations

Client Reference Manual | Fairmont Waterfront Safety Management

1. Introduction

SafeSight is an integrated safety intelligence platform designed to manage the end-to-end lifecycle of workplace safety. This guide provides step-by-step instructions for **Department Managers** and **HR/Safety Directors** to utilize the system's reactive and proactive features.

1.1 System Access and Authentication

The SafeSight journey begins at the public-facing intelligence landing page, designed to provide a high-level overview of the system's core value propositions before entering the secure environment.

1.2 Landing Page Interface

The **SafeSight Intelligence** home page (Figure 1.1) serves as the entry point for all hotel staff.

- **Service Highlights:** Users can quickly identify the three pillars of the platform: Predictive Risk Modeling, Real-time Incident Logging, and Automated Compliance.
- **Access Trigger:** To proceed to the operational tools, users must click the "Staff Login" button located in the top-right corner of the persistent navigation bar.

Figure 1.1

1.3 SafeSight Portal Login

Upon clicking "Staff Login," the user is directed to the SafeSight Portal (Figure 1.2), which functions as a secure research and operational environment.

- **Role Selection:** To maintain the security and integrity of the Fairmont Waterfront data, users must select their specific Access Level from the dropdown menu:
 - **Department Manager:** For incident reporting and front-line monitoring.

- **HR / Safety Director:** For executive oversight, resolution, and compliance exports.

Figure 1.2

Authorization: After selecting the appropriate role, clicking "**Authorize Access**" will redirect the user to either the **Incident Report Form** (for Managers) or the **Command Center Dashboard** (for Directors).

2. Incident Reporting (Department Manager Workflow)

Use **LOG INCIDENT** button on the SafeSight Command Center to land on this page.

The safety lifecycle begins with accurate data entry. Department Managers are responsible for documenting every hazard immediately.

The form is titled "Advanced Safety Incident Reporting" and is divided into several sections. The first section contains four dropdown menus: "Department" (set to "Housekeeping"), "Shift" (set to "Morning"), "Incident Type" (set to "Slip/Fall"), and "Severity Level" (set to "Low"). The second section is "Specific Work Area" with a text input field containing "e.g. Lobby, Kitchen Line, Room 402". The third section is "Incident Date & Time" with a date and time picker showing "yyyy-mm-dd --:-- --". The fourth section is "Detailed Description" with a large text area containing the placeholder "Describe exactly what happened...". The fifth section is "Initial Root Cause Assessment" with a text input field containing "e.g. Missing wet floor sign, improper lifting technique". Below this are two checkboxes: "Was PPE being used?" and "Immediate Hospitalization?". At the bottom is a large yellow button labeled "LOG INCIDENT".

Figure 2

1. **Access the Form:** Navigate to the "Report Incident" tab.
2. **Input Data:** Fill in the incident date, location, and severity.
3. **Narrative Description:** Provide a detailed "Sequence of Events."
 - o *Note: This data is critical for the AI Engine to generate accurate recommendations.*

4. **Submission:** Click **"Submit"** to sync the record to the MySQL database.

3. Real-Time Management (Operations Control)

Use **DASHBOARD** on the navigation and **Operations** button on the SafeSight Command Center to land on this page.

Once an incident is logged, it appears in the **SafeSight Command Center**.

Figure 3: The Operations Control Interface.

How to use this view:

- **Monitor High-Level KPIs:** Check the Total Logs, Critical Pending, and Hospitalized cards at the top of the screen for instant situational awareness.
- **Identify Hazards:** Browse the Active Safety Observations table. Look for the color-coded Severity tags (e.g., Pink for "Critical") to prioritize your workflow.
- **Implement AI Recommendations:** For every active row, refer to the AI Recommendation column. These are prescriptive fixes generated by the system (e.g., *"Deploy 'Wet Floor' signage"*).
- **Resolve Incidents:** Once the physical hazard is cleared and HR has reviewed the file, click the green "Resolve" button to archive the record.

4. Strategic Analysis (AI Intelligence View)

Use **DASHBOARD** on the navigation and **AI INTELLIGENCE** button on the SafeSight Command Center to land on this page.

For long-term planning, directors use the **AI Strategic Intelligence** dashboard to identify departmental trends.

Figure 4: AI Intelligence Dashboard with Recharts Visualizations.

How to use this view:

- **Risk Velocity:** Use the historical trend line to see if incidents are spiking in a specific month (e.g., February).
- **Severity Mix:** Use this pie chart to identify the severity distribution.
- **Departmental Profiling:** Review the Department Risk Profile bar chart. Departments like Maintenance and Front Office currently show the highest risk frequency.
- **Safety Radar:** Use the radar chart to see a 360-degree view of safety performance across all 20+ departments.

5. Proactive Prevention (Predictive Risk Engine)

Use **ANALYTICS** on the navigation to land on this page.

This standalone module allows you to prevent accidents before they occur using the Random Forest Classifier.

Figure 5: Predictive Risk Engine Cards.

How to use this view:

- **Probability Monitoring:** View the Risk Probability bar for each department. A "High" orange bar indicates a high statistical likelihood of an incident in the next 30 days.
- **Strategic Action:** Instead of waiting for a crash, implement the Prescriptive Action listed on the card (e.g., "Rotate heavy-duty tasks" for Housekeeping).
- **Confidence Levels:** Check the Prediction Confidence to understand the statistical strength of the AI's forecast.

6. Compliance Automation (WorkSafeBC Export)

To finalize the safety workflow and satisfy regulatory requirements: Use the **WORKSAFEBC** navigation to land on this page.
